

Application Guide:

BDT-1780 Rust-Tight

- BDT-1780 Rust-Tight was designed to easily lock and seal tight rust in its tracks.
- BDT-1780 Rust-Tight is easy to apply by brush, roller or spray, depending on the size of the project at hand.
- First step – always remove as much of the loose or flaking material from the surface or as needed to create a surface that will be appealing visually.
- BDT-1780 Rust-Tight turns the rust/metal oxides into a hard-inert material that stops any further rusting.
- BDT-1780 Rust-Tight dries quickly at room temperature;
 - o Warmer temperatures or in direct sunlight will shorten the dry time.
 - o Whereas high humidity or cooler temperatures will increase dry time.
- FGI-1780 should be top coated with FGI-7600 or similar protective topcoat.

NOTE! *Always wear gloves when working with this product as handling it can stain the applicator's skin!
